

Dear ladies and gentlemen!

On behalf of the Inspectorate for Control of Mining, Geological and Industrial Safety under the Ministry of Mining Industry and Geology of Uzbekistan, I would like to welcome participants in the 15th Securex Uzbekistan 2024 Anniversary International Exhibition.

The dynamics of industrial production in the world and growing production volumes of mineral materials pose new challenges in the field of health and safety. The Government of Uzbekistan pays particular attention to implementation of modern security technologies, fire extinguishing systems and prevention of man-made disasters.

Securex Uzbekistan is the largest security exhibition in Uzbekistan serving as a convenient business platform for demonstrating the latest equipment and technologies and helping meaningful dialogue between industry professionals and manufacturers.

I am sure that participation in the exhibition will be an important stage in the development of your business and will contribute to the establishment of new business relations.

I wish everyone fruitful work at the exhibition!

B. Gulyamov,
Head of Inspectorate
